

Psychic Warfare® Assault Weapon

Owner's Manual

Cursing, the evil eye and all other branches of psychic warfare have a history as long as mankind. They range from evil thoughts to another precipitating violence, to the cursed dropping down dead; remote influencing and remote killing in US military parlance. To imbibe in effective psychic warfare® you have to:-

i) Use evil spirits, demons to possess the cursed and by i to the i technology, hurt, give cancer to, drive mad or kill the cursed. Medieval grimoires are full of rituals to invoke evil spirits to afflict your enemies.

ii) Invoke the Luciferic or satanic forces (enemy of god and Schizophrenic evil side of the mad Elohimic God) to kill for you. The Luciferic force is invoked by killing, torturing, eating the Elohim's creatures – illuminati love. The Satanic force invoked by giving your soul to eternal torture at the hand of the Elohimic god in return for temporal power – the Faustian Bargain. The two entities Lucifer and Satan are not the same; Lucifer can be bargained with if you have the stomach for wetwork, Satan is to be destroyed by all means possible as it is the evil side of the mad god Elohim that offers only hell in return for your soul. Born again Christians are therefore FUBARED forever. Anything that wants your soul should be avoided at all costs!

iii) Using your own bioenergies to project over the target, remote viewing to hijack their bioenergetic field (The morphogenic field switches DNA on and off – Rupert Sheldrake’s research, Oxford biologist) remote sensing, to add worm viruses to hurt and kill them. The so call US military remote manipulations to kill the victim (see David Morehouse ex DIA remote influencer).

iv) The Montauk Sage Radar remote killing program (the factual basis for the: Stranger Things Internet series), to link a psychic with the four vector of electromagnetism to build a real world Monster of the Id (see the film Forbidden Planet 1956). This four vector version of humans was predicted by Albert Einstein’s Unified Field Theory that plagiarised Theodore Kaluza’s work (a Prussian physicist 1926) to generalise General Relativity in 5 dimensions. Having a four vector electromagnetic five dimensional body, The Monster of the Id gives you god-like powers. The US military deep state desperately tried to build the: Monster of the Id from mind controlled subjects – this failed as the Monsters of the Id killed these mind slaves. They then used psychics the Monster of the Id then killed attacked them. Allegedly the most successful psychic created a Monster of the Id that it could partially control. Unfortunately the Monster of the Id reverted to the norm and had to be buried under 5 floors of filled in concrete to bury it alive when it went off reservation (see the Montauk Experiment circa 1970).

The US military deemed Monster of the Id Technology too uncontrollably dangerous to continue in 1970 and shelved the research; going back to primitive types (iii) psychic warfare®: The Stargate Program carried out by the DIA and CIA. It took Tim Rifat the perfect Monster of the Id technology – the key being that only 2% of humans – the psychopaths can safely use Monster of the Id without being killed by them. Merging your being with the four vector produces a Monster of the Id from your primal urges mind – The Id. Psychopaths don't fight these urges, the 98% of herd humans do – so their own monster kills them. Illuminati who slaughter the Elohim's flock for the Luciferic Force can easily merge with their Monsters of the Id – so the secret is to have no conscience – be pitiless and totally ruthless (see Castaneda's: The Power of Silence) Monsters of the Id give Strategic power such that one of my lieutenants: Code Named The Great Lord Beast caused the Fukushima Event, while Tim Rifat: The Psi-Lord controls all Muslims and White Supremacists for ritual Luciferic murder rituals.

vi) Sympathetic Magic Cursing:- The Voodoo Doll: this uses i to the i technology to put pins (3 spaces) in a doll (3 Space) that is linked to the 3 space of the target by nail clippings, hair, blood... It is ineffective unless you are a Bocor (voodoo black magician) and can steal the 3 space soul (timelike scalar) to put in the doll to guarantee effective cursing.

The Psychic Warfare® Assault Weapon can therefore benefit by having a voodoo doll target to shoot at. Since energy content increases the potentials of Psychic Warfare® available, optimising the energy content of the voodoo doll target increases effective remote killing. Energy content is optimised:

i) By using the Psychic Warfare® Assault Weapon on A-listers who have high energy content to contribute, pay for their remote killing. A-list dolls add to the remote killing by adding sympathetic magic to the weapon.

ii) Using Barbie, Sindy, Action Man and G.I. Joe dolls with the faces of any target on them to add energy content to remote killing low energy targets like your boss, spouse, enemy... arseholes of little worth. The Barbie, Sindy, service with its male component Action Man, G.I. Joe... toy soldiers optimises the voodoo doll methodology. Since huge numbers of children have powered these dolls in the noosphere, talked to them, played with them, the archetypal dolly is a must have to use as target practice with

your gun, made into a psychic assault weapon by addition to psychotronic crystals[®], psychotronic generators[®], Sublime Good Engines and Bone Generators[®]. This being future Psychic Warfare[®] brought back to the past to change the past by use of precognitive remote viewing – mastered by Tim Rifat many years ago. Blasting away at dolly targets on the gun range therefore maximises energy content for effective remote killing. The Gollywog doll a caricature of blacks is highly recommended for killing effectively with psychic technology negros, as the Gollywog has been charged by generations of children playing with their Gollywog- Tim Rifat had one so it is lodged in his consciousness.

iii) Using imagery that has been seen by millions of people of the target, such as pop videos, films, political speeches, embarrassing episodes (such as Ant crashing into an immigrant car while drunk – linked to the mini an iconic car); their Facebook, Instagram account – which adds energy content to remote killing by self-similarity of nonlinear systems that enables Facebook, Instagram... to be bled of energy to synergies, power remote killing. Zuckerberg's Facebook debacle has added lots of energy to target anyone on Facebook by adding Zuckerberg's picture to the opposite side of the printed picture. You need to print the picture on paper or get a 3D printer to make a dolly to convert the target from computer space, 2D matrix space, to 3D; 3space, by printing on 3space, 3D paper. Zuckerberg can be put on the back if using Facebook imagery.

iv) Using Russian time density research that sucks time density out of the target to produce cause to the target's picture on paper that collects time density for effect. The Russian psychic warfare® programme found that paper is an excellent collector of time density, so putting the targets image on paper makes an excellent target for shooting practice: to i to the i (pins in voodoo dolls) the target to degrade their health, mental abilities-

powered by the time density of the target. A full description of time density comes on the 300 mp3's for customers in the restricted section – warning they are highly explicit and will offend everyone as is their purpose to bleed energy from the rich, Zionists and Nato – the West to optimise remote killing. They constitute a degree course in psychic warfare for psychic assassins and should be seen in that vein. – remember Tim Rifat feeds off enemies and people who are offended with him. Why? With Vampire technology all enemies sign a contract to feed the Vampire for whom they are enemy. All the 300 mp3's degree course can synergise the Psychic Warfare® Assault Weapon to add endless years of experimentation. They are highly recommended for wanabee psychic assassins, military personnel, secret police and spies... Therefore optimising the energy content of the target enhances remote killing by adding energy content to the i (3 space) that is possessed by the other i (3 space) in the same way that high energy pubescent teenagers are the prime prizes of demons as their sexual energy is virginal and just blossoming. As you can see the Psychic Warfare® Assault Weapon is just a generalisation of demonic possession and therefore is a subset of Luciferic Science known to the illuminati and used by them on their enemies. Until recently this Luciferic technology worked for the Zionist bankers until the hostile takeover of illuminism by Tim Rifat. One can see the consternation in their ranks with the loss of power and vulnerability to remote killing.

Now we come to the fundamental problem of Psychic Warfare®. It is a high energy pursuit and therefore off limits to everyone but people such as Tim Rifat or Katy Perry, Taylor Swift who have weaponised public terror or adulation respectively to raise their energies to Monster of the Id levels. Tim Rifat is the male with the largest bundle of Psi-power, hence his name is the Psi-Lord; whilst forerunners such as Madonna have been bled dry by his psychic vampiric attacks. Perry's pissed off with Tim Rifat – see the Hey Hey video and Taylor has conceded she is no match for him (taking a knife to a gunfight). Miley who was going to take over from Madonna is the dark horse lurking in the wings to takeover when Perry implodes to become the illuminati's top trump female witch.

Now all of this illuminati politicking is useless for the man in the street who wants to be a psychic assassin. To this end Tim Rifat manufactured the Psychic Warfare® Assault Weapon to meet the needs of the low energy individuals that wish to partake of high energy weapons to enable remote killing. This owner's manual takes you through all you will need to make anyone: ill, mad, cause a breakdown or and kill; then attack their Soul – a revolution in military technology. As a devotee of the Great Man Mao I realise his famous quote: 'Power comes at the barrel of a gun', is a maxim for overachievers like myself. Tim Rifat realised he could not compete in the rigged economic kleptocracy of the Zionist bankers so understood Mao's doctrine to kill them all with the Psychic Warfare® Assault Weapon. Defence is impossible because it is not decades away but hundreds of years away in terms of scientific advancement and any precognitive remote viewer simply lack the intelligence to reverse engineer for future psychic warfare® methodologies in 2018.

Mao's adage holds the key to all power. The gun holds the pole position in the upline of power that goes from the bottom to the top in the noosphere – Psi-space. Tim Rifat is the Psi-Lord because he owns the gun that enforces all reality in the real world of Man. Democracy is a sham, the gun enforces the Zionist bankers kleptocracy of the West, Putin's oligarchal Russia, China's communist Mao - Xia Zing Ping, whilst Africa, Central South America are self-explanatory. Since the gun is the totem of power in Psi-space, the noosphere, i to the i technology putting the customer's 3 space in the archetype of the gun, raises the common man to god in the world by enabling him to remotely kill anyone, anytime, anyplace as long as he has the persistence to constantly use the gun on the target in Psi-space. The Zionist Bankers, A-listers... your boss are helpless before the archetypal power of the gun. The Psi-Lord's Monster of the Id has possessed the Moslems to turn the gun in world consciousness by bringing it to every western city and (i) to the (i)-ing humans with high speed psychic warfare enhanced lead Self Similarity, of nonlinear systems then merges the Psychic Warfare® Assault Weapon's energy field with all guns that have ever been used.

If you remotely view Psi-space (most humans are deaf, dumb and blind in anything but the narrow box of perception agreed upon by the consensus) you will see, hear, feel lines of power that emanate from beings. In the world of Man there are all constrained, moulded and directed by violence, fear, murder and sanction – the symbolic archetype of which is the gun. Humans ultimately sanction in killing people – humans are forced into line by the gun. So by moving through 90° from 1 to $-i$ (clockwise movement in Psi-space that gives us energy or 1 to i (anticlockwise which requires energy – in this case from the archetype of the gun) and merging our being with the archetype of the gun, we become superbeings. The end user of the Force emanating from beings, animals or humans. We can use the Psychic Warfare® Assault Weapon on aliens or interdimensional demons to increase the scope of killing. Remote viewers can travel to distant locations as spacelike or timelike out of body being (if they have enough energy) to kill anyplace in the universe. So by entering the archetype of the gun in real virtual space at the i position (see Argand Diagram), the gun loses power from its archetypal store. By entering the archetype of the gun at the $-i$ position 90° turn to the left in the noosphere we gain energy; from where? The people, aliens, demons we kill provide energy for us the end user by becoming damned $-i$ timelike souls – our victims. Therefore one can see Luciferic psychic warfare is embodied in the Psychic Warfare® Assault Weapon to make it so powerful it has changed the world. The $-i$ direction also supplies the -1 timelike component to kill the bodies of the target. A mathematician will be able to see that Tim Rifat has applied Gödel's Incompleteness theorem to enter mathematical

spaces above those of mathematics as known to Man – with remote viewing this is child's play. All that is important for the customer is that entering the archetype of the gun carries out i to the i and gives normal humans the psychic power to kill by passing decades of acquisition of energy that is impossible to all non-illuminati who are not A-Listers. All the services on all my websites gain their activation energy to work from the Psychic Warfare® Assault Weapon which bump starts the other services using its preeminent power in human affairs. Once you plug the other services into the gun it goes from simply being able to potentially kill one person, alien, demon to other effects that use bullets not only to kill, but change reality by killing: Hilbert Space, Wheeler Space, pathways, multiversal beings that the victim needs to live, achieve fame, power, fortune... These options killed by an enhanced Psychic Warfare® Assault Weapon.

The gun in itself embodies the i to the i technology in that the bullet a 3 space equivalent to i goes down the barrel of a gun, another 3 space (i) to produce real world effects in the target. Looking at the gun from a purely mathematical space (M above normal M) one can see the general principle of i to the i , as in A bombs where two pieces of fissile material are imploded into each other and H bombs whose hydrogen nuclei are fused together produce real number effects but convert mass to energy – **bang!** Likewise the Psychic Warfare® Assault Weapon converts mass to energy, the mass though is complex number mass, that is lost to the gun when you use it. As Isaac Asimov (the famous science fiction writer) wrote in a short story, there are two crossroads for sentient races to overcome – death by nuclear weapons and death by psychic weapons, that drive mad, kill the race. The illuminati's Georgia Guide Stone plan to lower human population to 500 million, eliminating at present population levels 6.9 billion humans is the time-line we find ourselves in now Tim Rifat has invented the Psychic Warfare® Assault Weapon. The master race that lords it over the Brave New World survivors, will not be Zionist bankers but Tim Rifat's Psychic Warfare® Assault Weapon armed followers. Once a weapon is created it is always used, that is the nature of Man. Deploying $E = mc^2$ from complex number space to kill in the real number world by reality modification by operating on the line of fate that navigate humans through the multiverse, is revolutionary and the game changer.

Using M above normal M mathematics one can begin to see the equivalence between the c^2 (c = the speed of light) and i to the i , 2 is the third term of the Fibonacci spiral series that moulds shapes observation, 3 spaces are equivalent to i , whilst c is simply a 3 space travelling through the 5th dimension. Hence to make the Psychic Warfare® Assault Weapon work we need quartz crystals that by the piezoelectric effect and the Russian Sergeyev Sensors effect (see 300 mp3's for customer) enable interaction with the 5th dimension. To build the propellant for the gun not from gunpowder, cordite... but from complex number ($E = mc^2$). It is rather amusing that the Atlantean civilisation that supposedly pre-dated the modern one used quartz crystals for their technology.

As we use complex number space for our weapon we cannot ignore the other complex numbers. Quaternions are used to navigate software through 3 space, to make things algorithmically i - 3 space so to move our victim from i to $-i$ (dead, spacelike scalar Force to timelike Scalar force requires a quaternion to be built into the Psychic Warfare® Assault Weapon. Hence the weapon has three primary components to access quaternion complex number space: the gun, positive torsion field psychotronic crystal® and negative torsion field psychotronic crystal®, with the real number component being you and the negative number movement your victim. A quaternion is such that it is composed of a real number and i , j and k being the 3 types of complex numbers in quaternions.

Thus we have 3 separate 3 spaces interacting for the Psychic Warfare® Assault Weapon effect. Octonions which consist of 7 complex number types can be added to kill the dark energy matter demons of the 7 universes of dark energy mater (see Carlos Castaneda's: The Fire From Within). Exorcism can be revolutionised by the Psychic Warfare® Assault Weapon to kill demons; Elmer Fudd from Bugs Bunny Loony Tunes can therefore say: 'I'm hunting demons not rabbits'. So one can see that unlike a normal gun that can be disassembled and put back together, the Psychic Warfare® Assault Weapon is beyond the skill or ability of primitive 21st century man to completely understand. That does not mean more primitive version cannot be built from scratch. Unfortunately Tim Rifat does not share so has blocked anyone else from making the weapon.

The Psychic Warfare® Assault Weapon was built in Vietnam as this country has the earth energies to perfect the gun. The Vietnamese lost 2 to 8 million people defeating the American Superpower war machine with AK47s and the French, losing 500,000 people. In Vietnam the gun: AK47 manifests ultimate power defeating jet fighters, helicopter gunships, tanks, bombs... of the Americans and French. So the forging of the Psychic Warfare® Assault Weapon was mandatory in its need for Vietnamese Psi-space and the million dead needed to use the Hundredth Monkey effect in 3 space (100^3) to construct the weapon. Those of you that have the Death Star Service can use the weapon on a strategic scale like the Great Lord Beast who devastated Fukushima using the weapon he purchased in the future. War as we know it has branched into Psi-space and is fought in ways

opaque to the uninitiated. The mass invasion of the West by migrants: Chad world is a resultant of the use of the weapon on a strategic scale to sow the seeds in the noosphere of the Georgia Guide Stone future. The Psychic Warfare® Assault Weapon used for ethnic cleansing. As you can see like any arms designer, Tim Rifat has the misanthropic character to match. From non-linear dynamics the starting conditions of any chaotic system define the end result. The only way to control chaos is with a paradox engine. So Tim Rifat used the Psychic Warfare® Assault Weapon on the French and Americans in 1954 and pre 1975 to kill off the time-lines where they won victory over the Vietnamese creating a paradox engine (double paradox time-lines coupled), where the Vietnamese who were defeated in the French and American time-lines could form the milieu to enable Tim Rifat to build the weapon in a future time-line that did not exist, impossible in the old mathematical system. Totally possible to the remote viewer Tim Rifat that operates in M above normal M mathematical domains where the paradox engine is allowed, once brought in to normal M domain it irrevocably changes what is possible.

Unfortunately for the Americans, French and all EU members (joined by self-similarity), Australians and all other participants on the losing side; spending billions to emulate Tim Rifat's Psychic Warfare® Assault Weapon proves fruitless. So the American or EU weapon not only does not work but it kills anyone in its complex number $E=mc^2$ blast range, reducing America and the EU to ruins (mad disabled population) simply by trying to build them in America or the EU (the ultimate potent protection). Likewise the Chinese and Russians who try to copy the super genius Tim Rifat will find their weapons can't work. The only place you can build an effective weapon is in Vietnam, built by Vietnamese the so called primitive weapon boosting the Vietnamese economy by billions. Or it can be built in the UK by Tim Rifat as he was the progenitor of the Psychic Warfare® Assault Weapon boosting Tim Rifat's bank balance by billions and the UK government's coffers. This means the Russians and Chinese will have to pay the Vietnamese to develop the weapon for them and Nato will have to pay Tim Rifat and the British government for more advance version. Either way the Vietnamese are recompensed for the American war and Tim Rifat becomes a billionaire... with the UK charging over the odds to America and the EU. It is no coincidence the UK has officially left the EU and poison of the French as Tim Rifat used the weapon on the EU during Brexit. If Britain rejoins the EU as Tony Blair demands all hopes of a New British Empire founded on the Psychic Warfare® Assault Weapon expire. Tim Rifat will simply move to Vietnam and build the weapon there.

The rather complicated explanation of the weapon was not meant to confuse but point to the fact that what is impossible to science is defined by perception. According to quantum mechanics the observer collapses the quantum wave function to produce a probabilistic universe where the infinite possibilities of the quantum world are localised as a fuzzy set of particles defined by Heisenberg's Uncertainty Principle. As a remote viewing scientist Tim Rifat observed the M above normal M domains to add the science what was impossible prior to these observations by Gödel's Incompleteness theorem. The nerds at university are deaf, dumb and blind to all except the inside of their little boxes of observation that they meticulously characterise to boost their self-importance, the hamster in its cage running around its wheel. What made Tim Rifat so special was that he was a controllable hyperpsychic remote viewing scientist, not an expert in any field but capable of understanding all of them.

You should use actual guns and tape the small clear Psychotronic Crystal® to the magazine (for automatics – revolvers need tape on the bullet barrel, the smokey Psychotronic Crystal® goes on the barrel, or can go on the stock. For small Saturday night specials you can cup both hands around the little gun so the Psychic Warfare® Assault Weapon i to the i's you. The gun possessing you to convert you after a hundred times of usage to a living weapon that can use the larger clear and smokey Psychotronic Crystal's® to be held in your hands to get the gun's archetype to i to the i you so you can fire your Psychic Warfare® Assault Weapon in Psi-space without use of an actual gun – perfect for the work scenario where you want to start killing, driving mad, everyone in your office. Using a larger automatic or rifle you can tape the clear Psychotronic Crystal® to the magazine, the dark Psychotronic Crystal® to the barrel.

Future weapons will have the Psychotronic Crystal® built into the gun for dual usage, actual or real virtual. They will have to come from Vietnam or the UK all other locations are useless or devastating such as America, EU that kill anyone who purchase them. The UK cannot manufacture without Tim Rifat, whilst the Vietnamese can. The UK is useless without Tim Rifat relocating part of Vietnam to the UK for weapon construction. Firing the gun at targets with the victim's image or dolls should be done continually. A standing wave is set up by i to the i-ing yourself to be a gun (using a Saturday night special) particularly with a revolver, you can put both Psychotronic Crystals® on the butt of the weapon, or using an assault weapon where the gun rifle is i to the i-ed by you by having your fingers through the trigger which forms part of the 3 space of the gun.

Psychic Warfare® Assault Weapon

Owner's Manual

By Tim Rifat
